---

Java Developer with 4+ years of experience in Java 8, Spring Boot, Spring MVC, Spring Data JPA, Hibernate, SQL, and REST API development. Experienced in developing backend applications, REST APIs, microservices, database operations, and business logic. Hands-on experience with Apache Kafka, Spring Security, JWT, Docker, AWS, CI/CD, JUnit, and Mockito.

TECHNICAL SKILLS

Languages: Java 8, SQL
Core Java: OOP, Collections, Exception Handling, Multithreading, Streams, Lambda
Backend: Spring Boot, Spring MVC, Spring Data JPA, Hibernate, REST APIs, Microservices
Database: PostgreSQL, MySQL
Messaging & Security: Apache Kafka, Spring Security, JWT, OAuth2
Tools & DevOps: Git, Maven, Docker, AWS, CI/CD
Testing: JUnit, Mockito

WORK EXPERIENCE

Software Engineer | LTIMindtree | Sep 2022 – Present | Noida , India

Java 8 | Spring Boot | REST APIs | Microservices | Hibernate | Kafka | PostgreSQL

- Developed and maintained **RESTful microservices** using Java 8, Spring Boot, and Spring MVC.
- Utilized **Spring Data JPA and Hibernate** for database operations, query optimization, and efficient data retrieval.
- Worked with **PostgreSQL and MySQL**, including indexing, query tuning, and schema modifications.
- Designed and integrated **Apache Kafka producers and consumers** for event-driven communication between backend services.
- Implemented **Spring Security, JWT, and OAuth2** for authentication and authorization.
- Containerized backend applications using **Docker** and supported deployments on **AWS EC2, ECS, and ECR**.
- Implemented **CI/CD pipelines** using Git, Jenkins, Maven, and GitHub Actions.
- Developed unit tests using **JUnit and Mockito** to improve code quality and prevent regression issues.
- Participated in **code reviews, sprint planning, daily stand-ups, and Agile/Scrum activities.**

Software Engineer Intern | LTIMindtree | March 2022 - June 2022 | Bangalore, India

- Developed a user-friendly travel itinerary search application.
- Built backend REST APIs and integrated them with UI modules.
- Contributed to code development, debugging, and API testing.

PROJECTS

Library Management System | *Java* | *Spring Boot* | *Spring Data JPA* | *Hibernate* | *MySQL* | *Spring Security*

- Developed a **Library Management System** using Spring Boot and Spring Data JPA.
- Implemented book management and **CRUD operations** with MySQL database integration.
- Added **Spring Security** for authentication and authorization and used Thymeleaf for the web interface.

Employee Management API| *Java* | *Spring Boot* | *Spring Data JPA* | *Hibernate* | *MySQL* | *REST APIs*

- Developed an **Employee Management REST API** using Java and Spring Boot.
- Implemented **CRUD operations** and database persistence using Spring Data JPA and Hibernate.
- Followed a layered architecture using **Controller, Service, and Repository** layers.

Spring Boot REST API Portfolio | *Java* | *Spring Boot* | *PostgreSQL* | *Hibernate* | *Docker*

- Developed a containerized **Journal Management REST API** using Spring Boot and PostgreSQL.
- Implemented **CRUD operations, DTOs, validation, and global exception handling** using layered architecture.
- Used **Docker Compose** to run the application and PostgreSQL database together.

EDUCATION

Bachelor of Technology (BTech) in Computer Science & Engineering
IIMT College of Engineering | 2018–2022
